PCIM Asia Shenzhen 2026: Asia's premier power electronics event returns to South China

PCIM Asia Shenzhen serves as a key gathering for researchers and engineers from across the global power electronics community.

Active in China since 2002, the event continues to drive innovation by adapting to changing market needs. By combining an exhibition with an academic conference, it brings together an international audience from across the power electronics ecosystem.

The focus for 2026 will be on high-growth application areas including e-mobility, renewable energy, artificial intelligence and data centres. To highlight the latest technical advancements in these fields, the show floor will feature several dedicated areas, among them the Power Electronics for E-mobility Zone and the Industrial Chain Display Zone.

PCIM Asia Shenzhen 2026 figures

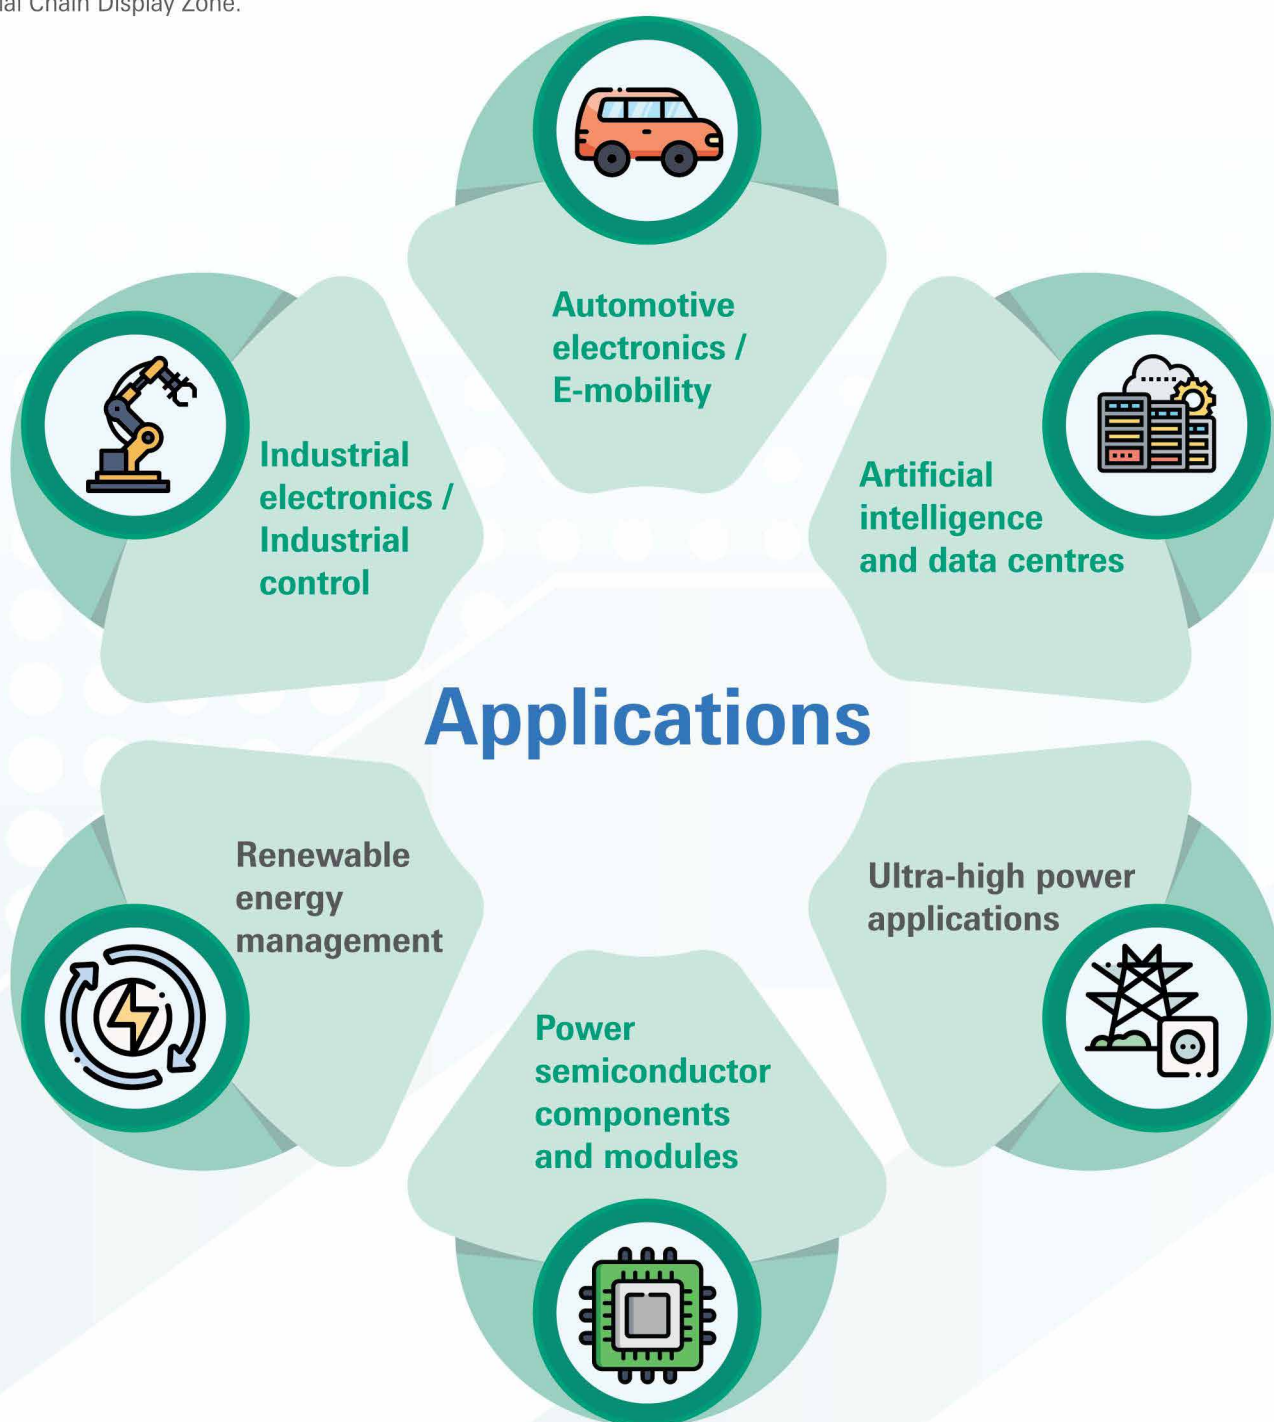

300+
exhibitors (estimated)

30,000 sqm
exhibition space (estimated)

28,000+
buyer visits (estimated)

Fringe programme

Summits

- Global Strategy Summit
- Power Semiconductor Rising Stars Summit

Media joint forums

- WBG Semiconductor Ecosystem
- Theme Forum: Analysis of the Current Status and Trends in the Power Semiconductor Market

Exhibitor theme forums

- GaN For Physical AI Theme Forum
- E-Mobility Theme Forum
- Smart Drive and Motion Control Forum
- Solid State Circuits Breaker Theme Forum
- WBG_SiC Theme Forum
- WBG_GaN Theme Forum
- Applications of SiC Theme Forum
- AI Power Supply Applications Theme Forum
- Packaging Theme Forum I & II
- IGBT Theme Forum
- Clean Energy and Power Quality Management Theme Forum

Exhibitor testimonials

"The 2025 edition has been very productive, with many successful sales meetings and customer visits. The PCIM series is probably the best for our company when it comes to meeting with actual customers and getting business done."

**Ms Linda Williams, Director of Marketing Communications,
Power Integrations**

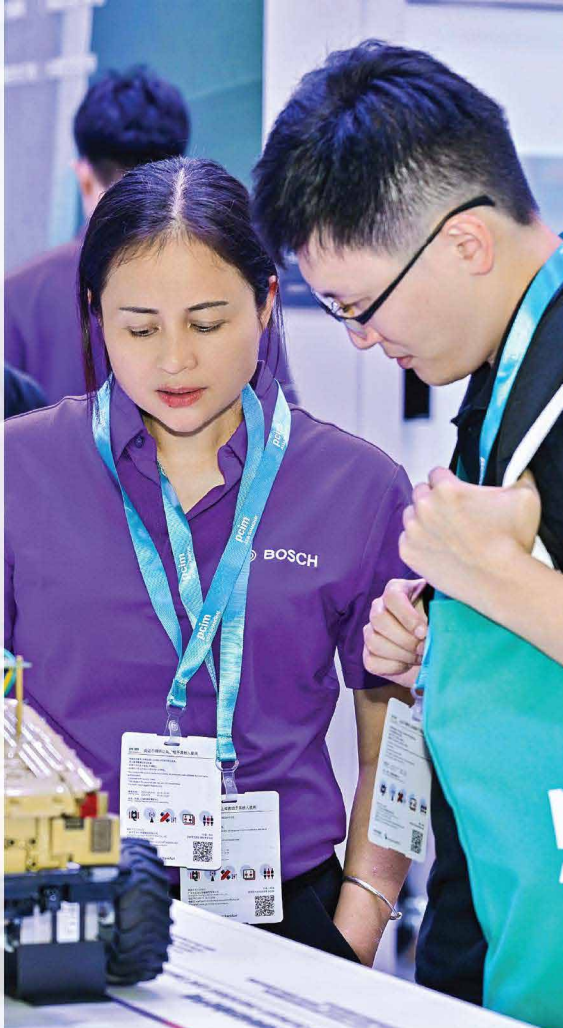

"As a major event for the power electronics industry, this platform brings together leading companies to present the latest in cutting-edge technology and innovation."

**Mr Hua Wang, Deputy Head, Power Semiconductor Device Group,
Minebea Trading (Shanghai) Ltd**

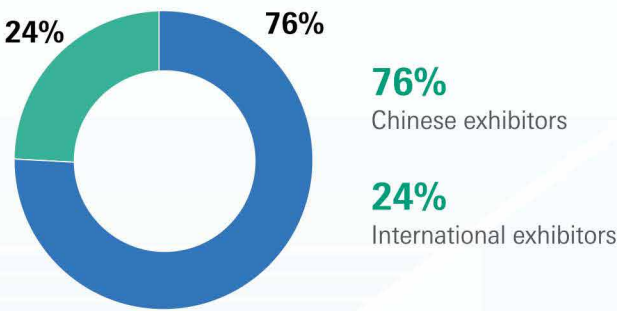

"After three years of developing our own power semiconductor division as part of our expansion into the upstream industry, our components are now in mass production in our own appliances, and we chose this renowned event to officially introduce them to the wider market. The results have been very positive."

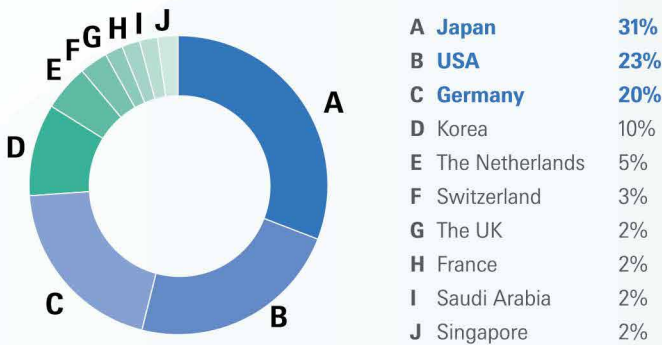

**Ms Jenny Wu, Director of Sales Department,
Power Semiconductor Development Division, Hisense Power Semiconductor**

Conference

A user-driven platform

Industry meets academia

Please be sure to join us and celebrate this event. Now let's begin our keynote presentation of today. The technology trend and future perspectives.

Peer-to-peer knowledge sharing

我们来到这里，我们向你们的演讲、出席和支持表示热烈的感谢。在我们继续之前，我们提供明年的概览。嘉宾也将在这里退出。

Technological Evolution and Future Perspectives of Electronic Power Conversion

Chair: Meiqin Mao, Hefei University of Technology
Speaker: Liu Chang

Poster Dialogue Sessions

Conference participant testimonials

"I was very pleased with the engagement after my keynote. We had key figures and industrial leaders asking deep questions on topics ranging from AI power trends to our research into liquid metal."

Prof Teng Long, Professor of Power Electronics, University of Cambridge

"The conference plays a positive role in fostering exchange between academia and industry, bringing together global experts for high-level dialogue."

Prof Yongdong Li, Vice Dean, New Energy Vehicle Research Institute, Tsinghua University

"As a semiconductor engineer focused on silicon carbide, I've found the techniques shared here quite insightful. For example, one talk on a new method to monitor chip temperature, a key challenge in our field, presented a very promising new approach."

Mr Peter Pang, Semiconductor Device Engineer, Alpha Power Solutions Limited
